## Swanline invests in die-cutter to boost large-format printing

Ben Bold, [packagingnews.co.uk](http://packagingnews.co.uk), 11 March 2010

Point-of-sale display and packaging specialist Swanline Print has bought a Klett Cobra Express high-speed automatic die-cutter.

The machine, which has been set up alongside Swanline's Nuri SOL 2517, [which the firm installed last August](#), can be configured to run with a lead-edge feeder or top feed unit and can produce 300mm-plus high batches and 1,400mm or 1,700mm high stacks.

Swanline hopes the die-cutter will strengthen its large-format business. It is capable of running carton grades from 1mm up to 9mm double wall corrugated and can run at speeds over 6,000 feeds per hour.

Nick Kirby, Swanline's managing director, said: "The Klett Cobra Express adds a significant dimension to our capabilities.

"Not only does it represent outstanding performance and value, but it also offers a size advantage over other machines in the market," said Kirby.
